### ***Reviews***

*This pdf is indeed gripping and interesting. It is definitely simplistic but shocks within the 50 percent of your book. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

This book is a step-by-step tutorial to guide you through learning WCF, Entity Framework, LINQ, and LINQ to Entities. You will be guided to create six WCF and Entity Framework solutions from scratch, of which three are multi-layered real-world WCF service solutions, so you will not only be reading, but also be coding through the book, to gain...
