How can the musicians ear penetrate the complexities and theoretical abstractions of the twentieth-century music? This book offers a solution: it enables the student to perceive essential musical connections at the core of modern music by identifying and drilling the distinctive structures and processes of the twentieth century's greatest composers. Michael L. Friedmann has developed and successfully tested a method that combines theory and exercises to give students a deeper understanding of modern music. Using musical examples from the works of Debussy, Bartk, Schoenberg, and Stravinsky, Friedmann begins with extensive work in sight-singing and dictation. The chapters that follow develop clear, multifaceted approaches to intervals and dyads, transposition and inversion, melodic contour, and three-and four-element set classes. In these chapters Friedmann offers students opportunities not just to identify the twelve trichord and twenty-nine tetrachord types, but to explore their structural possibilities. He also demonstrates the relation of these set classes to the diatonic, whole-tone, and octatonic scales. Finally, Friedmann introduces set classes of more than four elements, as well as twentieth-century modes. The book provides a wealth of musical excerpts including melodies composed by the author himself to test analytic listening ability and to make the student with each set class. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
