

The Settlement of the American Continents: A Multidisciplinary Approach to Human Biogeography

By -

University of Arizona Press, United States, 2016. Paperback. Book Condition: New. Reprint. 279 x 216 mm. Language: English .

Brand New Book. When many scholars are asked about early human settlement in the Americas, they might point to a handful of archaeological sites as evidence. Yet the process was not a simple one, and today there is no consistent argument favoring a particular scenario for the peopling of the New World. This book approaches the human settlement of the Americas from a biogeographical perspective in order to provide a better understanding of the mechanisms and consequences of this unique event. It considers many of the questions that continue to surround the peopling of the Western Hemisphere, focusing not on sites, dates, and artifacts but rather on theories and models that attempt to explain how the colonization occurred. Unlike other studies, this book draws on a wide range of disciplines—archaeology, human genetics and osteology, linguistics, ethnology, and ecology—to present the big picture of this migration. Its wide-ranging content considers who the Pleistocene settlers were and where they came from, their likely routes of migration, and the ecological role of these pioneers and the consequences of colonization. Comprehensive in both geographic and...
